Why the change ?

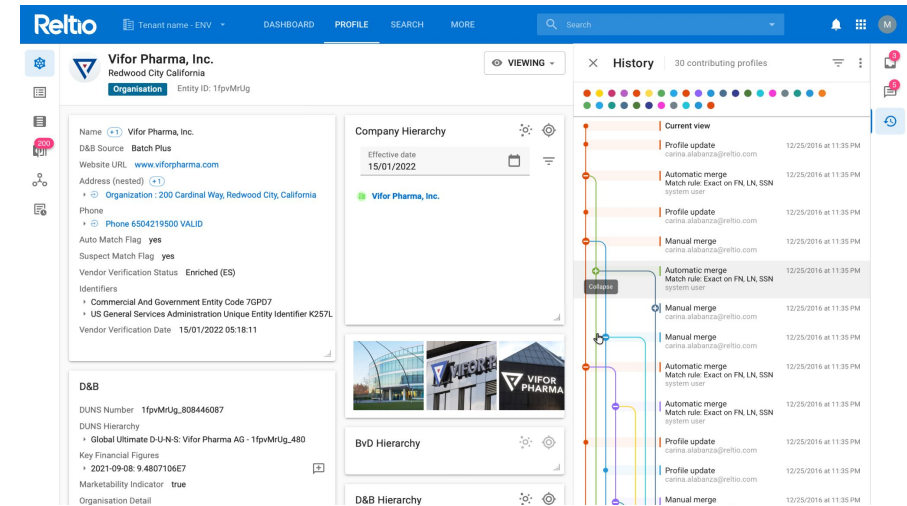

Rollout

# What is the new & modern Reltio User Experience

## Enhance productivity and user experience with a modern UI

Reltio New UI is a completely redesigned and rebuilt user interface. It's an intuitive & modern user experience keeping in mind the needs of data stewards, analysts and business users alike. The new Reltio UI allows users to

- **Quickly navigate** through our modernized interface for simplified experience
- **Personalize** their user experience with the information relevant to them
- Better content discovery with a **focused search** experience
- **Easily understand** entities and relationships
- **Efficiently steward** data

# Why the change ?

## Why did we decide to revamp the Reltio UI

- Provide customers & users with the latest design concepts
- Modern technology stack that is scalable, stable and high performant
- Accelerate the pace of innovation
- Self-service configuration

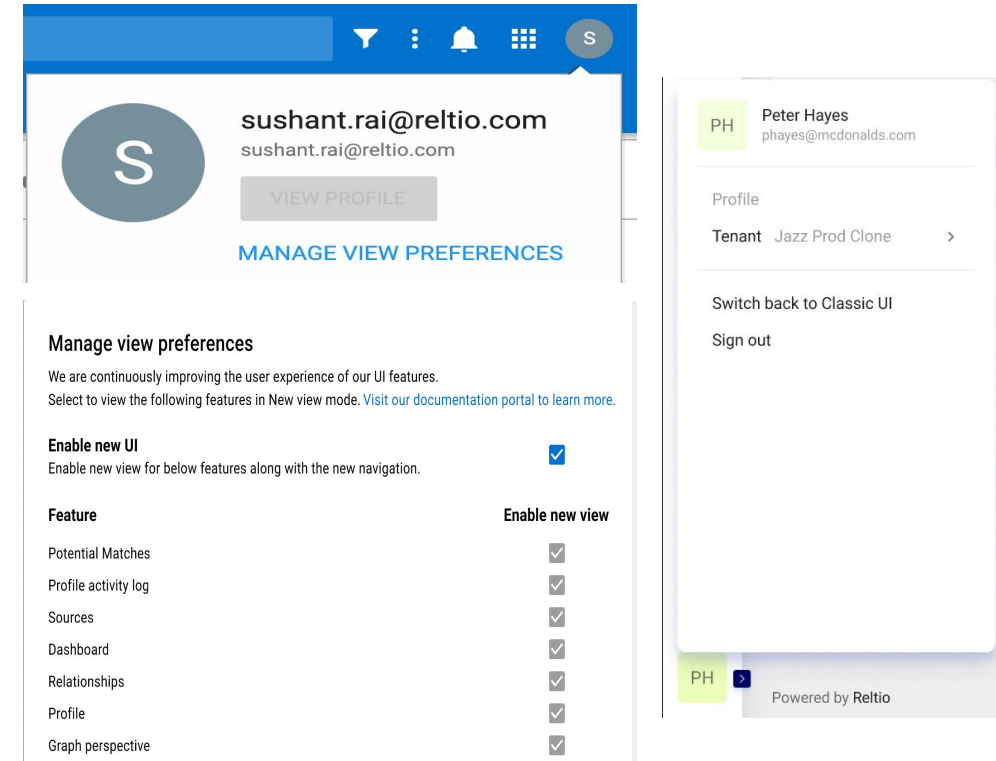

The new Reltio UI is going to replace the existing or classic UI that customers currently use.

# Rollout

## What is the Rollout plan for New Reltio UI

- The New Reltio UI is generally available for ALL customers to adopt
  - Users can switch to New UI from [User Preferences](#) and try it out
  - Customers can raise a support ticket in case they want all users on a particular tenant to be switched to New UI
- All new customer tenants will have only New UI enabled
- We intend to deprecate current/classic UI with 2022.3 Release - October 12, 2022. At this date all customer tenants will be switched to the New UI

Thank you
